To prevent drying out during packing, plants are "heeled in" in wet sand instead of sawdust. Everything possible is done to keep plants in perfect condition every moment from the time they leave the fields until they reach your door. No expense is spared to make sure that every plant reaches you in first class, live, growing condition!

EVERY PLANT IS DEPARTMENT OF AGRICULTURE INSPECTED!

Every plant in all fields and nurseries in Ellis, Van Zandt and Smith counties in Texas where stock handled by us is grown, and in greenhouses, lathhouses and grounds is inspected each year by inspectors from the Texas Department of Agriculture. Naughton Farms, Inc., complies with the laws of all states in transporting nursery stock. When you buy from Naughton Farms, Inc., you get only disease-free plants—the best that can be grown.

Hardy Throughout The United States

The rich soils and favorable location of growing fields where stock is raised assure you strong, hardy, well-developed plants. The understock or root structure of a plant determines its hardiness. All our budding is done on high-quality, extra sturdy understock (*Multiflora Japonica*) that produces plants that will be equally vigorous anywhere in America.

Because of the climate in which our plants are grown they enjoy a longer growing period and naturally develop more complete root systems. Our two-year-old plants have the benefit of 18 to 20 months of actual field growth, whereas in many sections of the country the same stock would have the benefit of only 12 to 14 months of growth.

GET THEM DIRECT FROM AMERICA'S ROSE GARDEN

During the many years that we have been associated with the rose industry, we have visited and bought roses from all of the principal rose-growing sections of the country. As a result of the first-hand experience thus gained, it is our firm belief that Texas is by far the greatest rose-growing state in America. Its rich sandy soil, mild climate and long growing season produce bigger and better rose plants. Most of our roses are produced in the rich soils of the Natchez River in East Texas—a section that may truly be termed the "Rose Garden of America!"

Texas-grown roses are just as hardy in the North as they are in the South. The hardiness of a rose does not depend upon the climate or soil in which it is grown—it depends upon the understock on which the rose is budded. All Naughton roses are budded upon the finest Multiflora Japonica understock and are capable of standing all kinds of weather. Texas-grown roses, due to the long growing season they enjoy, are fully matured when they leave our nurseries, thus assuring you the best of blooming plants the first season you plant them in your yard or garden.

Today we are one of the largest shippers of two-year-old, field-grown roses in the entire United States. We never list a rose until we have seen it ourselves, are sure of its blooming qualities, and firmly believe that it will give our customers complete satisfaction.

When you buy Naughton roses from this catalog you may rest assured that they are tested and proven roses. Years of experience in proving each variety of budded roses listed in our catalog, a large staff of capable rose growers, conscientious old-fashioned honesty, and a jealous care of our reputation for fair dealing, have brought Naughton Farms, Inc., an army of thousands of satisfied rose customers from all over the world. We are justly proud of them—we are justly proud of the roses that we ship!
